# BarrierWall

FEATURES

- High acoustic and visual benefits

- Customise the look and finish

- Fast construction times

- Strong and durable

- Can accept multiple panel types

- Can retain up to 750mm of soil (2.5kPa surcharge live loads) when used with the TerraFirm75 retaining panel

No longer does a commercial noise wall have to look like one.

ModularWalls commercial BarrierWall combines the pleasing look of a domestic wall with the strength and acoustic soundproofing qualities required of a commercial wall, and also offers multiple panel options.

MODULARWALLS®

# BarrierWall

ANCILLARY OPTIONS

WALL FINISHING
The system once installed is ready to accept any self-priming acrylic paint (no additional primers needed). Where graffiti may be a concern, a final coat of Anti-Graffiti paint is recommended.

COMMERCIAL GATES
Gates are available for acoustic, security or access applications - custom made for specific applications.

ADDITIONAL FEATURES
Every BarrierWall can accept multiple features such as lighting, intercoms, cameras, feature panels or acrylic screens.

EXPRESSED JOINT
Add an architectural feature with our Expressed Joint profile.
