

SlimWall® Aluminium

SlimWall is our premium fencing solution for modern urban environments.

About SlimWall® Aluminium

SlimWall® Aluminium is our premium modular fencing solution that combines quality and value. With its sleek, modern design, acoustic properties and ability to integrate retaining, lighting, infills and slats, SlimWall® is the fencing revolution that Australian homeowners didn't even know they were waiting for.

It has proven acoustic properties, incorporating AcoustiMax 50® wall panels for privacy, peace and quiet. Our proprietary SlimWall® Aluminium post has a robust design, making it suitable for a pool fence and front feature fence. It offers endless design possibilities with the incorporation of lights, gates and slat infills.

Features:

- Proven acoustic performance
- Ideal for poolside or coastal applications
- Light-weight modular construction for quick installation
- Customisable

Applications:

- Boundary Walls
- Pool Walls
- Acoustic Fences
- Premium Fences
- Dividing Walls and Fences

SlimWall® Aluminium Post and Wall Capping Options:

Flush post and wall capping

Panel Joining Options:

Standard Joint

Express Joint

Ancillary Options:

Wall Finishing

The system will accept any self-priming acrylic paint. Each neighbour can finish their side to reflect their individual style and colour theme.

Tiling & Stone Cladding

Tiling your wall or just a particular section can add an excellent feature or statement to your ModularWalls.

Slats & Infills

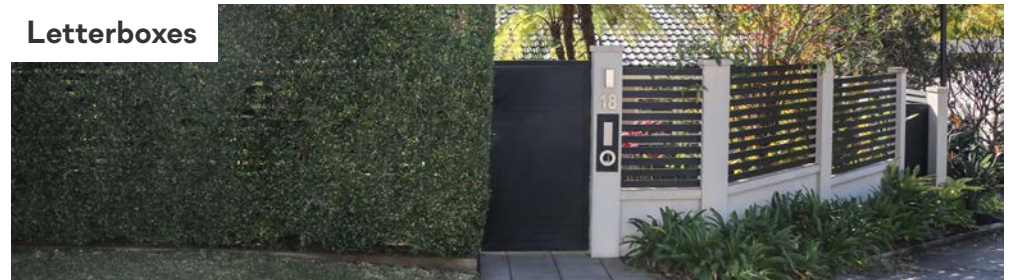

Add a designer edge to any wall, with varying height slat or infill options.

Lighting

The wall panels have internal recesses to accept concealed cables for lighting or intercom style requirements.

Letterboxes

Incorporate most styles of letterboxes or utilise our own Stainless Steel faced modular box.

Gates

The system will accept any self-priming acrylic paint. Each neighbour can finish their side to reflect their individual style and colour theme.
